## EDUCATION

---

### Mewar University

*Bachelor of Technology in Electrical Engineering*

Chittorgarh, Rajasthan

*July 2013 – June 2017*

## EXPERIENCE

---

### Software Engineer (MERN)

*Classic Informatics*

April 2021 – Present

*Gurugram, Haryana*

- Building full-stack web applications using MongoDB, Express.js, React, and Node.js.
- Responsible for developing scalable features, integrating APIs, and optimizing performance and user experience.

### Intern (MERN)

*Newton School*

Aug 2020 – Apr 2021

*Bangalore, Karnataka*

- Developed strong proficiency in web development technologies such as HTML, CSS, JavaScript, React, and Node.js through practical implementation.
- Explored ways to visualize GitHub collaboration in a classroom setting.

## PROJECTS

---

### Metamesh AI | *React, Tailwind, MSAL, TanStack Query*

July 2023 – Present

- Developed user-friendly React interfaces for **Metamesh**, an AI-powered business data platform.
- Implemented secure authentication and authorization using MSAL, and helped present complex data as clear, actionable insights.

### Roaming Duck | *React, Redux, SASS, Node.js, MongoDB*

Aug 2022 – Sept 2023

- Built key features for **Roaming Duck**, an itinerary planner app for booking flights, hotels, and activities, with trip notes and sharing functionality.
- Developed and integrated frontend and backend components using React, Redux, Node.js, and MongoDB to deliver a smooth trip-planning experience.

### Isomer.ai | *React, Redux, SASS, Material-UI, React-Flow*

Jan 2022 – Aug 2022

- Built and maintained React-based UI for **Isomer.ai**, an industrial AI platform for biopharma manufacturers.
- Developed drag-and-drop pipeline workflows using React Flow, integrating AI model results with third-party systems.

### The HiVE | *React, Redux, Google Places API, Bootstrap*

May 2021 – Jan 2022

- Developed a location-centric SaaS application to track and manage cleaning services using real-time geolocation data.
- Built and integrated features using React, Redux, Google Places API, and Node.js to manage clients, staff, and services by location.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, HTML, CSS

**Frameworks:** React, Node.js, Express.js, Material-UI, Vite

**Developer Tools:** Git, VS Code, Visual Studio, IntelliJ

**Libraries:** Redux, React Flow, React Markdown, MSAL
